Professional Summary

Computer Science graduate with hands-on experience in full-stack development, AI integration, and human-computer interaction research. Skilled in building scalable applications using Golang, TypeScript, React, and modern databases, with a strong foundation in Android development and collaborative software engineering. Adept at applying problem-solving skills and research-driven approaches to deliver reliable, user-focused systems.

Education

Temple University

Jan 2021 - May 2025

Bachelor of Science in Computer Science GPA: 3.66

Philadelphia, PA

Montgomery County Community College

Aug 2020 - Dec 2022

Associate of Science in Computer Science GPA: 3.80

Blue Bell, PA

Experience

Research Assistant

May 2025 - Aug 2025

Temple HCI Lab

Philadelphia, PA

- Architected a full-stack AI copilot using Go, TypeScript, and PostgreSQL to support the lab's research on the effects of Generative AI on students.
- Designed and implemented the PostgreSQL schema and data persistence logic, ensuring data integrity for research analysis.
- Contributed directly to primary research by building features to test specific hypotheses about user behavior.

Projects

Local Sky | *Android, Firebase, SQLite*

- Led a 4-person team developing a collaborative Android weather application in Kotlin.
- Engineered backend services with a SQLite cache to reduce API latency and enable offline functionality.
- Integrated a third-party weather API, handling JSON parsing and error handling to ensure data reliability.

CLOVER | *Typescript, React.js, Golang, PostgreSQL*

- Integrated Google's Gemini AI into a VS Code extension with rich logging of user interactions.
- Developed a Go service to capture user interaction data from the extension and generate AI suggestions.
- Established and maintained a CI/CD pipeline with GitHub Actions to automate testing and deployment, improving development velocity.

Technical Skills

Languages: Golang, Kotlin, Java, Typescript, Python, C#, C

Databases: PostgreSQL, SQLite, Firebase

Tools: Git, Github, Github Actions, Docker, Windows, Linux, Android Development

Libraries: React.js, Tailwind CSS
